

Building Smoke Ready Communities in Washington: How to Prepare, not React

Nektarios Hagler, @NektariosH, Program on the Environment, University of Washington

Site supervisor: Michael McGown, Region 10 of the EPA

Faculty advisor: Elena Austin, Occupational and Environmental Health Sciences, University of Washington

- How are we currently preparing for wildfire smoke incidents and why we need to adjust our approach.
- The four immediate steps we can take to evolve with our changing environment.
- Why wildfire smoke isn't going anywhere meaning we have to adjust quickly and effectively.
