COVID & Cuisine: Can a Global Pandemic Lead to Social and Sustainable Food?

Cat Kelly, @1nquisitiveCat, Program on the Environment, University of Washington

Site supervisor: Judy Feldman, Organic Farm School
Faculty advisor: Stanley Asah, School of Environmental and Forest Sciences, University of Washington

- The US food system is unsustainable and vulnerable to system shocks
- COVID-19 has impacted people’s food choices and made them more aware of these systemic issues
- The aim of this project was to create a podcast which promotes a more resilient and sustainable food system

December 2nd, Online, 4:30PM-7:30PM
