Think Global, Act Local: Ocean Pollution Reduction
Kate Terrado, @katerrado_, Program on the Environment, University of Washington
Site supervisor: Margaret McCauley, Environmental Protection Agency, Region 10
Faculty advisor: Kristina Straus, Program on the Environment, University of Washington

- Reports suggest that 80% of microplastics in the ocean come from land-based activities
- Tracking and monitoring your waste is important
- Technology can play a vital role in waste management
