Using Air Index Quality to Understand the Role of Environmental Indices in Policy Making

Selena Xie, @SelenaaaXie, Program on the Environment, University of Washington
Site supervisor: Zach Hedgpeth, U.S. Environmental Protection Agency, Region 10
Faculty advisor: Timothy Larson, Civil and Environmental Engineering, University of Washington

- Air Quality Index indicates public health effects of air pollution, but is not often used in policy making
- Environmental indices make complex data easy to understand
- The study explores qualities of indices that are useful for policy makers

December 2nd, Online, 4:30PM-7:30PM
