ENVIR 240
The Urban Farm

Summer 2021
Full Term
MW 2:30-4:20pm
5 cr
no prereqs

NW
Biological Systems
Instructor:
Madison Bristol, MPA & MMA Candidate

Terrific hands-on course to help you better understand urban and peri-urban farming practices.

- Learn more about the UW Farm and food production techniques in urban settings.
- Explore the connections between climate justice and food sovereignty.
- Experience firsthand urban farming growing techniques for many common garden plants.
- Gain a working knowledge of ecological approaches to pest control and enhancing soil quality.
- Apply your knowledge to growing your own food in whatever urban or peri-urban environment you might live in!
