

# ENVIR 100

## Introduction to Environmental Studies

### Summer 2022 Full Term

#### Asynchronous Online Instruction

5 cr

No prerequisite

*I&S/NW, DIV*

OPEN TO ALL STUDENTS

Required Core Course  
For ENVIR majors

Instructor:  
Yen-Chu Weng, PhD

- Learn about current and historical environmental challenges and responses, from climate change to social justice.
- Recognize the complexity in environmental issues and our local and global connection to the issues.
- Participate in a dynamic and unique learning experience through a well-designed asynchronous online course.
- Work in small teams on a multi-media poster project.

This class is an excellent opportunity to learn about the Environmental Studies major! This major focuses on the interactions between humans and the environment. Building on a foundation of natural science, social science & humanities, the major offers students a flexible curriculum that includes a project-based internship with a community partner as an integral part of the capstone sequence. Concentrations for the major include Policy & Planning; Climate & Society; Conservation of Living Systems; Education & Communication; Food Studies; and Sustainability.
