

# ENVIR 401

## Analysis of Environmental Cases

**Autumn 2022**

**TTh 2:30-4:20pm**

5 cr

Prereqs: ENVIR 301, 302  
*I&S/NW*

Required Core Course  
For ENVIR majors

Instructor:  
Yen-Chu Weng, PhD

This course will draw from a range of natural and social science disciplines to address environmental issues, as highlighted in specific, place-based cases.

- Learn to use data from the social and natural sciences to inform how environmental decisions are made.
- Understand sociocultural, socioeconomic, and ecological contexts for environmental decisions.
- Review local, regional, national, and international cases and understand how and why facts can be uncertain yet critical to addressing environmental problems.
- Synthesize diverse sources of information and stakeholder perspectives to present a comprehensive review of environmental cases.
